

DID YOU KNOW INFOGRAPHIC – RECRUITMENT MANEUVERS

Dräger

SUSTAINED INFLATION – 40 BY 40

Description

One of the most widely recruitment maneuver described is sustained inflation.

In the 40 cmH₂O for 40 seconds sustained inflation maneuver, the airway pressure is raised to 40 cmH₂O and maintained for 40 seconds. ^{(2) (3) (4) (5)}

How to perform it with a Dräger ventilator?

From any pressure or volume controlled mode:

Examples

Salvatore Grasso, Luciana Mascia, Monica Del Turco, Paolo Malacarne, Francesco Giunta, Laurent Brochard, Arthur S. Slutsky, V. Marco Ranieri; Effects of Recruiting Maneuvers in Patients with Acute Respiratory Distress Syndrome Ventilated with Protective Ventilatory Strategy. *Anesthesiology* 2002; 96:795–802 doi: <https://doi.org/10.1097/00000542-200204000-00005>

Conclusions: Application of recruiting maneuvers improves oxygenation only in patients with early ARDS who do not have impairment of chest wall mechanics and with a large potential for recruitment, as indicated by low values of EstL.
